INTERESTS

I enjoy creating things with my hands and am very drawn to crafts.

I love knitting shawls as they have a lot of versatility in construction, colors, and attire you can pair them with.

While knitting I came across lots of beautifully colored yarn and one day I asked myself *'Why not try it out yourself?'*. And that is where it all started. I took the plunge and tried dying some myself.

I now love planning out color combinations and effects that go well with my next project and following up by dyeing the yarn myself; it makes the final product even more special.
